

KB2005 : How to set the Catalog Search Results to automatically refresh when the MAAD2map window changes geographical extents.

This document outlines the feature to automatically refresh the catalog search results when the MAAD2map window changes – i.e. is zoomed in/out or panned.

1. To enable this feature, select the tickbox titled 'Auto Refresh results when map changes', located within the 'Select Catalog Library to Search' panel from the Catalog Search tab.

2. This feature can be permanently enabled from the Administration tab and selecting the Change Configuration button, and setting the option to 'Yes'.
